SKILLS

TECHNICAL SKILLS & TOOLS

Languages: Java/J2EE, Golang, Python

Frameworks: Spring MVC, Spring Boot, Gin, Flask, Hibernate (ORM), Spring Data JPA

DBMS: MySQL, PostgreSQL, NoSQL- MongoDB

Cloud: Azure, Pivotal Cloud Foundry, AWS

Monitoring: Dynatrace, Grafana

Testing & Automation Framework: JUnit, Mockito, Selenium, TestNG, unittest, go-mock

Other Tools & Technologies:

Redis, RabbitMQ, Apache Kafka, Containerization- Docker, Kubernetes, Elasticsearch, Jenkins, Git, PostMan, CI/CD, Maven

CORE CS

Operating System, Object Oriented Programming, Computer Networking
Data Structure & Algorithms, Computer Architecture, System Design, Machine Learning

EDUCATION

IIIT GWALIOR

INTEGRATED B.TECH AND M.TECH
IN INFORMATION TECHNOLOGY
2017 - 2022 | Gwalior, INDIA
CGPA: 7.67

EXPERIENCE

NETAPP | MTS-2

October 2023 - Present

- Developed and maintained a scalable IAM(Identity Access Management) solution/microservice using **Go & Gin framework**, securing access to NetApp BlueXP Platform through robust authentication and authorization.
- Worked across all phases of the SDLC, Involving Designing, Implementing, Testing, Bug fixing, Deploying, and monitoring using technologies such as **Go, Gin, MongoDB, PostgreSQL, Kubernetes, Grafana**.
- Integrated **Redis cache to improve RestAPIs performance** to reduce latency, prevent system overload & timeout errors.
- Implemented core backend features such as **audit logging, standard logging (Fluentd), API Versioning, rate limiting, caching, pagination**.

DELL R&D | SDE

January 2022 - October 2023

- Designed and Implemented Microservices and RESTAPIs as a critical component of a scalable distributed system that **facilitated seamless data processing from various Dell Enterprise servers**. i.e. optimizing data processing workflows.
- Leveraged technologies such as **Java/JEE, Spring, Spring Boot, Python, Flask, Hibernate, RabbitMQ, Kafka**, and more to develop the system, ensuring its efficiency and reliability.
- Consistently involved in all phases of the **Software Development Life Cycle**, encompassing Design, Development, Testing (unit testing & integration testing), Debugging & troubleshoot resolve technical issues, Maintenance/Monitoring

RAKUTEN | SOFTWARE ENGINEERING INTERN

June 2021 - Dec 2021 | Bangalore

- Worked on developing feature which was about to verify whether a particular website is rendering properly on different devices through automation instead of manual UI testing, by capturing location of all the components of website.
- Tech stack involved in the development are **Python, Writing Automation scripts using Seleium & Webdriver** for capturing location of elements.

PROJECT

Tinder Clone: Scalable Backend System

- Utilizing Java/Spring & Python to implement functionalities and integrate microservices for Tinder Clone.
- Developed microservices (**registration-svc, profile handler, feed engine, recommendation engine & other**) for user registration, profile management, recommendation generation using ML models.
- Optimized user-data storage using PostgreSQL and recommendation storage using Elasticsearch. Implemented **geo-location based sharding** techniques for query optimization.
